EVOLUTION

INTERNATIONAL JOURNAL OF ORGANIC EVOLUTION

PUBLISHED BY

THE SOCIETY FOR THE STUDY OF EVOLUTION

Vol. 60 **Subject Index** **2006**

Evolution, 60(12), 2006, pp. 2667–2671

ADAPTATION

Adaptation, adaptive evolution, block model, extreme value theory, mutational landscape, 1113

Adaptation, Asilidae, flush-pursuit foraging, foraging performance, geographic variation, *Myioborus*, plumage pattern, 1086

Adaptation, CO_2, chance, divergence, history, reverse selection, 1392

Adaptation, ecological inheritance, evolution, extended phenotype, inheritance, niche construction, 1751

Avena barbata, dehydration avoidance, drought escape, flowering time, natural selection, photosynthetic capacity, stomatal conductance, 2478

Coccidae, Hemiptera, herbivorous insects, local adaptation, local maladaptation, plant-herbivore interactions, *Saissetia coffeae*, 1859

Competition, ecotype, gene flow, *Helianthus exilis*, local adaptation, reciprocal transplant, reproductive hierarchy, serpentine, sunflower, 696

ADAPTIVE RADIATION

Adaptive radiation, *Anolis*, convergent evolution, diversification, ecomorphology, historical contingency, morphometrics, natural selection, 362

Adaptive radiation, colonization, Galápagos, land snails, speciation, species richness, 2311

AFLPs, Aizoaceae, edaphic selection, flowering phenology, South Africa, spatial genetic structure, succulent karoo, 39

Allopatric speciation, history of science, *Mimodes*, *Mimus*, *Nesomimus*, 370

Amphibians, diversification, hybridization, phylogeny, reproductive isolation, salamanders, speciation, 2585

Centrarchidae, disruptive selection, fish, *Lepomis*, microevolution, phenotypic plasticity, plasticity integration, trophic polymorphism, 801

Ecological speciation, gene flow, Hawaiian silversword alliance, lineage sorting, 1777

ALLOMETRY

Allometric growth, biphasic shape allometry, geometric morphometrics, isometric growth, *Littorina saxatilis*, local adaptation, ontogeny, rocky shore, 2490

BEHAVIOR

Acoustic communication, Dendrobatidae, geographic variation, masking interference, playback experiments, spectral partitioning, 1874

Adaptation, brood parasitism, diederik cuckoo, egg rejection, introduced species, Ploceidae, reverse evolution, trait loss, village weaver, 157

Behavioral reproductive isolation, mate preferences, sexual imprinting, speciation, zebra finches, 1076

Cuckoldry, mate monopolization, mating behaviors, satellites, sexual selection, sneakers, 1311

Density-dependent egg survivorship, filial cannibalism, parental care, parent-offspring conflict, paternal care, *Pomatoschistus minutus*, 2087

BIOGEOGRAPHY

Calibration, geology, mitochondrial DNA, molecular clock, range expansion, river capture, vicariance, 1038

Climate change, diversification rates, Neotropics, Pleistocene speciation, refuge hypothesis, 842

BOOK REVIEWS

A paleontologist's contribution to understanding the origins of mammalian biology, a review of *The Origin and Evolution of Mammals* by T. S. Kemp, 205

Exploring the implications of mosaic coevolutionary outcomes, a review of *The Geographic Mosaic of Coevolution* by John N. Thompson, 869

Making use of evolution, a review of *The Evolving World: Evolution in Everyday Life* by David P. Mindell, 2661

Plant reproductive strategies, a review of *Evolutionary Ecology of Plant Reproductive Strategies* by Tom J. de Jong and Peter G. L. Klinkhamer, 875

Presenting an evolutionary framework for conservation, a review of *Evolutionary Conservation Biology* by R. Ferriere, U. Dieckmann, and D. Couvet, 1956

Reducing an intellectual deficit: coalescent theory for (almost) everyone, a review of *Gene Genealogies, Variation and Evolution: A Primer in Coalescent Theory* by Jotun Hein, Mikkel L. Schierup, and Carsten Wiuf, 208

Rules for studying the evolutionary game, a review of *Evolutionary Game Theory, Natural Selection, and Darwinian Dynamics* by Thomas L. Vincent and Joel S. Brown, 202

Sexual tension: does conflict lead to costly mate choice?, a review of *Sexual Conflict* by G. Arnqvist and L. Rowe, 415

Statistical methods in (molecular) evolution, a review of *Statistical Methods in Molecular Evolution* by Rasmus Nielsen, 421

The origins of robustness, a review of *Robustness and Evolvability in Living Systems* by Andreas Wagner, 418

Threats from within, a review of *Genes in Conflict: The Biology of Selfish Genetic Elements* by Austin Burt and Robert Trivers, 2663

What mathematicians will see of phylogenies, a review of *Mathematics of Evolution and Phylogeny* edited by Olivier Gascuel, 872

CHROMOSOMAL EVOLUTION

Autopolyploid, inbreeding depression, minority cytotype, relative fitness, selfing, unreduced gametes, 1954

Chromosomal elements, chromosomal evolution, chromosomal inversions, chromosomal polymorphism, *Drosophila*, *Drosophila obscura* group, evolutionary rate, 768

Dosage compensation, genomic imprinting, parental antagonism, sexual antagonism, X-chromosome inactivation, 440

COALESCENT THEORY

Approximate Bayesian computation, coalescent, comparative phylogeography, echinoid, hierarchical model, meta-analysis, vicariance, 2435

COEVOLUTION

Avian malaria, local adaptation, major histocompatibility complex, resistance alleles, susceptibility alleles, wild passerine, 383

© 2006 The Society for the Study of Evolution. All rights reserved.

Bacterial density, *Culex pipiens,* insecticide resistance gene, *Wolbachia,* 303
Bird, coevolution, Columbiformes, parasite, specialization, 2158
Character displacement, competition, gene flow, hybridization, quantitative trait, spatial coevolution, species borders, 1344
Coevolution, community genetics, host switching, multispecific coevolution, specialization, 2207
Coevolution, flowering time, geographic mosaic, host-pathogen interaction, local adaptation, plant-pathogen interaction, *Pseudomonas viridiflava,* 1562
Coevolutionary cycling, disruptive selection, frequency-dependent selection, maintenance of genetic variation, multilocus genetics, victim-exploiter coevolution, weak-selection approximation, 1321
Gene flow, host, local maladaptation, parasite, population structure, selection mosaic, 24

Competition
Coexistence, competition, cycles, environmental variation, generalist, nonlinearity, specialist, 427
Competitive suppression, malaria, *Plasmodium chabaudi,* virulence, within-host competition, 1358

Development
Development, heterochrony, ontogeny, verterbrates, Von Baer, 2239
Evolvability, evolutionary novelty, exaptation, horned beetle, modularity, lability, *Onthophagus,* 2329

Epistasis
Adaptive dynamics, epistasis, genetic variation, invasion fitness, modifier loci, quantitative genetics, 1537
Additive variance, epistasis, genetic drift, population bottlenecks, quantitative genetics, variance components, 1763
Bacteriophage ϕX174, compensatory mutation, coordinated substitutions, protein evolution, sign epistasis, 2032

Evolutionary Genomics
Acanthocyclops vernalis, chromosomal rearrangements, copepod, crossbreeding, genome size, karyotype, reproductive isolation, 247
Antagonistic genes, linkage map, quantitative trait loci, sex-specific expression, Y chromosome, 1793
Birds, gene expression, genome organization, germ line, sex chromosomes, sexual antagonism, 1945

Extinction
Allozymes, genetic assimilation, hybridization, introgression, local extinction, *Raphanus raphanistrum, Raphanus sativus,* 1187
Deleterious mutation, extinction, fitness, genetic drift, inbreeding, local drift load, mutational meltdown, 184

Fitness
Calylophus serrulatus, habitat fragmentation, inbreeding depression, outbreeding depression, permanent translocation heterozygote, tallgrass prairie, 64

Gene Flow
Adaptation, AFLP, clines, ecotone, gene flow, 268
Allozymes, *Austrocochlea constricta,* dispersal, gene flow, marine, planktonic larvae, 2498
Competition, context-dependent fitness, crop-wild hybrids, gene flow, genotype × environment interactions, introgression, relative fitness, 2044
Gene flow, graph theory, isolation by distance, isolation by resistance, landscape connectivity, landscape genetics, resistance distance, 1551

Genetic Drift
Conversion, cyto-nuclear epistasis, genomic conflict, identity by descent, mating system, random genetic drift, 643
F-statistics, genetic drift, migration, mutation, population structure, 1

Genetic Variation
Adaptation, diversity, ecological opportunity, environmental complexity, experimental evolution, genotype-by-environment interaction, mutational heritability, 484
Adaptive dynamics, evolutionary branching, Levene model, maintenance of genetic variation, population genetics, protected polymorphism, symmetry breaking, 2226
Additive genetic variance, bottleneck, epistasis, genetic drift, population size, quantitative genetics, 2428
Balancing selection, computer simulation, guppy, *Gyrodactylus,* major histocompatibility complex, parasite, random genetic drift, 2562
Balancing selection, fitness variation, overdominant selection, sex-by-genotype interaction, sexual antagonism, X chromosome, 1445
Caenorhabditis elegans, genetic variation, outcrossing, self-fertilization, 1300
Changing environment, environmental variance, genetic variance, migration, mutation, plasticity, stabilizing selection, 1125

Heritability
Adaptation, animal model, desiccation resistance, evolutionary potential, heritability, quantitative traits, rainforest, 1104
Additive genetic covariance matrix, clutch effects, geometric morphometrics, Procrustes distance, quantitative genetics, 563

Hybridization
Androdioecy, heterogeneous ITS, hybridization, morphology, phylogeny, 1801
Bimodality, cline, ecotone, habitat preference, hybrid zone, introgression, linkage disequilibrium, 583
Canalization, developmental stability, *Drosophila madeirensis, Drosophila subobscura,* fluctuating asymmetry, geometric morphometrics, interspecific hybrids, quantitative genetics, 746
Chamaecrista fasciculata, epistasis, fitness, heterosis, hybridization, inbreeding depression, recombination, 225
Coadapted gene complexes, dominance, epistasis, hybridization, inbreeding depression, line cross analysis, outbreeding depression, recombinant inbred lines, 1585
Colonization, dominance interactions, population differentiation, *S* alleles, *Senecio squalidus,* sporophytic self-incompatibility, 213
Epistasis, fitness, genetic architecture, hybrid, hybrid zone, willow, 1215
Hybrid zones, *Manacus,* manakins, plumage, sexual selection, unidirectional introgression, 1476

Inbreeding
Drosophila, genetic load, genotype-by-environment interaction, purging, stress, 1014
Fitness, *Gasterosteus aculeatus,* heterozygosity, inbreeding depression, linkage disequilibrium, mate choice, microsatellites, 1658
Genetic load, inbreeding depression, natural selection, pedigree, purging, 762
Gynodioecy, inbreeding depression, mating system, outcrossing rates, selfing, *Wurmbea,* 529
Inbreeding, incest avoidance, relatedness, sequential mate choice, sex roles, sexual conflict, 467

Introgression
Admixture, gene flow, *Heliconius,* hybridization, introgression, isolation with migration, Lepidoptera, 1254
Phylogeography, genetic diversity, introgression, molecular differentiation, amplified fragment-length polymorphism, *Gossypium aridum,* 505

Life-History Evolution
Adaptive dynamics, apparent commensalism, evolution, evolutionarily stable strategies, parasites, theory, tolerance, 945
Adaptive phenotypic plasticity, food limitation, life history, maternal environmental effects, propagule size, reproductive effort, resource availability, 348
Age and size at maturity, logistic regression, maturation reaction norm, Pacific salmon, phenotypic plasticity, probabilistic reaction norm, 1516
Aging, complex trait, fat content, genetic correlation, longevity, metabolism, starvation resistance, 1435

Allometry, birds, clutch size, egg mass, nest predation, trade-offs, 390
Bang-bang strategy, clonality, commensal, mycology, resource allocation, saprophyte, 970
Bostrycapulus, Calyptraeidae, *Crepidula,* protandry, 735
Brood parasitism, comparative analysis, development, growth, habitat change, sibling competition, 1692
Clines, diapause, *Drosophila,* life-history trade-offs, 1602
Cryptic species, larval development, lecithotrophy, phylogeography, planktotrophy, poecilogony, sacoglossan, trans-Arctic exchange, 2293
Diversification bet hedging, dormancy, environmental unpredictability, heritability, microplasticity, phenotypic plasticity, seed germination, 2280
Growth, life history, *Menidia,* metabolic rate, metabolic scope, swimming respirometry, trade-off, 1269

Macroevolution
Cichlidae, comparative methods, duplication, integration, pleiotropy, 2096
Diversification rates, macroevolution, maximum likelihood, phylogeny, speciation, 1152
Evolution, flowering plants, irreversible, polyploidy, speciation, 1198

Maternal Effect
Caste ratio, indirect genetic effects, kin selection, queen-worker conflict, sex ratio, social evolution, 2552

Mating System
Alternative reproductive tactics, evolutionarily stable strategy, polyphenism, sexual selection, 399
Androdioecy, cryptic dioecy, mating system, paternity, pollination, spatial genetic structure, 2056
Animal, hermaphrodite, mating system, population genetic structure, progeny-arrays, self-fertilization, 1816
Aquilegia coerulea, columbine, floral display size, geitonogamy, hawkmoth, outcrossing rate, pollinator, 234
Breeding system, dioecy, mating system, outcrossing, self-incompatibility, selfing, 1098
Clones, deme, genetic structure, *Oncorhynchus, Plagioporus shawi,* selfing rate, Trematoda, 553
Dioecy, distyly, functional gender, protandry, protogyny, sex allocation, 660
Genetics of adaptation, *Linanthus,* pleiotropy, quantitative trait loci, self-fertilization, self-incompatibility, 491

Models/Simulations
Bias, comparative methods, generalized least-squares, independent contrasts, 1509
Competition, formulation, pollen pool, selfing, theory, 1952
Fitness landscape, Sewall Wright, shifting balance theory, spatial structure, underdominance, 448
Gene duplication, heterozygote advantage, natural selection, multigene family, polymorphism, 881
Good genes, hybrid incompatibility, mating preferences, quasilinkage equilibrium, sexual selection, 908

Molecular Evolution
Bayesian inference, evolutionary rates, molecular evolution, morphological change, neutral theory, 476

Morphological Evolution
Arthropods, character evolution, discrete traits, evolutionary trend, limb evolution, morphology, 1402
Bark anatomy, *Moringa,* morphology, ontogeny, phylogenetic comparative method, phylogeny, wood anatomy, 724
Bergmann's rule, body size, meta analysis, Rensch's rule, sexual size dimorphism, sexual selection, 2004
Biogeography, body form, character evolution, community ecology, homoplasy, macroevolution, phylogeny, reptiles, 123
Biomaterials, biomechanics, independent contrasts, major ampullate silk, phylogenetic signal, tensile test, web, 2539
Body size, character displacement, competition, island rule, predation, resource base, sexual size dimorphism, 1731
Brownian motion, *Brownie,* comparative method, continuous characters, disparity, morphological evolution, rate, 922
Canalization, cryptic genetic variation, developmental stability, evolutionary capacitor, geometric morphometrics, wing shape, 2529
Carnivora, cranial evolution, diet, morphological integration, phylogeny, 169
Convergence, geometric morphometrics, herbivory, lizards, morphospace, 824
Cycling population, geometric morphometrics, nonmetric traits, Q_{ST}/F_{ST}, selection, transferrin, 1925
Digit evolution, Dollo's law, reversal, Squamata, 1896
Ecomorphology, interspecific, comparison, locomotion, muscle, performance, 2137
Fluctuating asymmetry, geometric morphometrics, mandible, morphological integration, *Sorex,* 1291
Fourier analysis, molar shape, morphometrics, Murinae, phenotypic covariation structure, Rodentia, 1701
Genetic drift, islands, morphometrics, phenotypic variance-covariance matrix, selection, 2622
Lepomis, many-to-one mapping, *Micropterus,* performance, *Pomoxis,* rate of character evolution, suction feeding, 2575

Mutations
Complexity, Fisher model, mutation fitness effect distribution, mutational and selective covariances, random matrices, survey, 893
Environmental stress, fitness landscape, genotype-by-environment interaction, mutation, survey, 2413

Paleobiology
Amphibians, Branchiosauridae, development, developmental pathways, evolution, metamorphosis, neoteny, Temnospondyli, 1467

Parasitism
Acute infection, evolution of virulence, immune response, imperfect vaccines, mathematical models, within-host dynamics, 957
Coevolution, costs of resistance, cross-infection, infectivity, local adaptation, 1177
Coexistence, epidemiology, specialization, vaccination, virulence, 13
Cyprinidae, *Dactylogyrus,* host specificity, molecular phylogeny, Monogenea, morphological adaptation, 1023
Gasterosteus aculeatus, multiple infection, parasite transmission, relatedness of parasites, *Schistocephalus solidus,* simultaneous and sequential infection, within-host dynamics, 616

Parthenogenesis
Asexuality, Chrysomelidae, herbivorous insects, parthenogenesis, phylogenetic incongruence, polyploidy, speciation, 328

Phenotypic Plasticity
Adaptation, cost of plasticity, drought, *Lobelia cardinalis, Lobelia siphilitica,* phenotypic plasticity, photosynthetic gas exchange, 980
Development, genotype, measurement error, phenotypic plasticity, residual plot, 192

Phylogenetics
Abdominal pigmentation, Caribbean, *Drosophila cardini* group, interspecific cline, polymorphism, 1228
Alpheidae, adaptive radiation, character evolution, Crustacea, Decapoda, novelty, parallel evolution, 2507
Anelosimus, evolution of sociality, inbreeding, levels of selection, mating system, preadaptations, sex ratio bias, 2342
Diversification, evolutionary dead-end, extinction, irreversibility, phylogeny, speciation, 1743

Phylogeography
Allopatric speciation, biodiversity, center of origin, Coral Triangle, larval dispersal, marine phylogeography, stomatopod, 1825
Amphipod, cryptic speciation, dispersal, estuaries, glacial refugia, marine biodiversity, phylogeography, 257
Ant association, biogeography, habitat specialist, *Iridomyrmex,* mutualism, myrmecophily, obligate, 315
Climate change, coalescent simulations, comparative phylogeog-

raphy, *Parnassius smintheus,* Pleistocene glacial cycles, Rocky Mountain alpine tundra, *Sedum lanceolatum,* 1004
Evolution of migration, Holocene, *Junco,* phylogeography, postglacial expansion, *Spizella,* 2403

Physiology
Convergent evolution, countergradient variation, development, growth efficiency, *Sceloporus undulatus,* 1066

Plant-Insect Interaction
Acyrthosiphon pisum, assortative mating, ecological speciation, evolution of specialization, habitat choice, host preference, pea aphid, 1574
Adaptive radiation, coevolution, insect-plant interactions, larval habits, Nematinae, niche diversification, speciation rates, 1622
Biological invasion, diffuse evolution, evolutionary response, herbivory, *Lotus wrangelianus, Medicago polymorpha,* plant competition, 56

Pleiotropy
Adaptive dynamics, antagonistic pleiotropy, balancing selection, dominance, evolutionary dynamics, protected polymorphism, 1991
Mismatch repair, *msh-2,* mutation accumulation, mutational covariance, population size, selection, 2655

Polymorphism
Alpine swift, directional selection, growth rate, melanin-based coloration, sexual selection, signaling, 2370

Population Biology
Bayesian inference, Cormack-Jolly-Seber model, fitness function, individual covariates, penalized splines, random effects, WinBUGS, 460
Mitochondrial DNA, morphology, parallel evolution, phylogeography, *Poecilia reticulata,* population genetics, selection, vicariance, 2352

Population Genetics
Analysis of molecular variance, F_{ST}, genetic variation, microsatellites, mutation rate, population structure, 2399
Approximate Bayesian computation, demography, effective population size, HIV-1, metapopulation, 1165
Assortative mating, evolution of recombination, modifier model, mutation-selection balance, 1337
Bacillus subtilis, experimental evolution, mutation accumulation, prototrophy, regressive evolution, selection, 686
Canalization, epistasis, epistatic constraint, evolvability, genetic architecture, 1523
Caste determination, invasion, parthenogenesis, reproduction system, *Wasmannia auropunctata,* 1646

Population Structure
Coadapted gene complexes, *Drosophila birchii, Drosophila serrata,* epistasis, line-cross analysis, local adaptation, *Montium* subgroup, 106

Predation
Antagonistic selection, antipredator traits, *Leucorrhinia caudalis,* Odonata, spines, survival trade-off, 1306
Aposematic, conspicuousness, learning, neophobia, predation intensity, recognition errors, 2246

Quantitative Genetics
Axial skeleton, G-matrix, heritability, natural selection, quantitative genetics, *Syngnathus scovelli,* vertebral number, 404
Dominance, epistasis, life history, morphology, nonadditive effects, quantitative genetics, 1981
Epistasis, *Mimulus guttatus,* mixed mating, selection, self-fertilization, 711
Gene mapping, male fitness, mating ability, quantitative genetics, sexual selection, 1427

Reproductive Isolation
Bioacoustic variation, genetic variation, microsatellites, *Physalaemus pustulosus,* reproductive isolation, túngara frogs, 1669
CMS, cytoplasmic male sterility, hybrid incompatibility, *Mimulus,* QTL mapping, postzygotic reproductive isolation, 1372
Floral isolation, hummingbird pollination, plant speciation, pollen-pistil interactions, tropical biology, 538

Reproductive Strategies
Adaptation, egg-laying, incubation, live-bearing, reproduction, snake, 115
Anther-stigma interference, dichogamy, inbreeding depression, pollen discounting, population genetic model, self-fertilization, 934
Hermaphrodite, protandry, shrimp, size-dependent sex allocation, 1840

Selection—Experimental
Acclimation, coevolution, genetic variation, habituation, pathogen, phenotypic plasticity, resistance, selection, serial passage, 31
Cost of immunity, Diptera, encapsulation, experimental evolution, infection, parasites, *Scatophaga,* 1612

Selection—Group/Kin
Allee effect, altruism, demographic stochasticity, environmental stochasticity, kin selection, recolonization, 1137
Arthropods, community evolution, community genetics, cottonwood, extended community phenotype, indirect genetic effects, *Populus,* 991
Direct fitness, heterosis, inbreeding depression, joint evolution, kin competition, mass action model, pollen dispersal, seed dispersal, 2257
Invasions, *Linepithema humile,* relatedness, social evolution, social insects, supercolonies, unicoloniality, 782

Selection—Natural
Amphibian, eco-devo, Korea, norm of reaction, ovum size, tadpole, 142
Animal model, breeding value, egg-laying date, environmental covariance, natural selection, *Parus major,* 2381
Cyclades, flower color, F_{ST}, genetic drift, natural selection, Q_{ST}, 518
Developmental constraint, evolutionary medicine, Hox genes, left-right asymmetry, modularity, phylotypic stage, pleiotropy, 2643
Divergent natural selection, ecological speciation, flowering time, life-history divergence, local adaptation, 2466

Selection—Sexual
Acari, antagonistic coevolution, enforced monogamy, experimental evolution, mating systems, sexual selection, sperm competition, 1868
Adaptive ridge, direct selection, divergence-with-gene flow, fitness valley, indirect selection, parapatry, plasticity, 1242
Ancestral state reconstruction, carotenoid, color, constraint, continuous character, evolution, lability, 1680
Animal model, heritability, lek paradox, sexual selection, zebra finch, 2389
Barn swallow, breeding date, Darwin-Fisher theory of sexual selection, fecundity selection, *Hirundo rustica,* sexual dimorphism, 856
Bird song, geographic variation, mate choice, sexual selection, swamp sparrow, vocal performance, 1936
Cryptic female choice, postcopulatory sexual selection, sperm competition, sperm quality, sperm size, 2064
Cuticular hydrocarbons, *Drosophila serrata,* experimental evolution, fitness, good genes, indirect benefits, sexual conflict, 2218
Dendrobates, Epipedobates, good genes, maternal allocation, offspring viability, sexual selection, 2148
Dominance, reproductive opportunities, sexual selection, sperm allocation, sperm competition, 1486
Fecundity selection, mathematical model, pleiotropy, polygamy, polygyny, sexual selection, 674
Fitness, natural selection, sprint speed, territoriality, testosterone, 2122
Foraging, locomotion, performance, predation, territoriality, 1888
Lifetime fecundity, longevity, male manipulation, *Pieris napi,* polyandry, sperm competition, 1638

SENESCENCE
Age at first reproduction, disposable-soma theory of aging, free radicals, life-table response experiment, resistance to oxidative stress, senescence, 1913
Aging, artificial selection, experimental evolution, frailty, genetic correlation, Gompertz, senescence, trade-off, 1494
Aging, cytoplasmic, *Drosophila melanogaster*, female, Gompertz, life span, mitochondria, mtDNA, senescence, 2081

SEX
Campeloma, cryptic hybridization, geographic range, mtDNA, nuclear intron, parthenogenesis, sexual reproduction, 1417
Chlamydomonas reinhardtii, epistasis, evolution of sex, experimental evolution, mutation, mutation clearance, recombination, 2272
Fecundity selection, female size, male anadromy, male size, sex ratio, sexual selection, 196

SEX RATIO
Certation, dioecy, female-biased sex ratios, pollen intensity, seed set, stigmatic pollen loads, wind pollination, 1207
Conflict, direct fitness, helpers at the nest, kin selection, local resource competition, overlapping generations, sex ratio, 2012
Lizard, sex allocation, sex ratio, sexual-size dimorphism, temperature-dependent sex determination, 2131

SEXUAL CONFLICT
Arms race, floral longevity, pollen competition, pollination, protandry, receptivity, 2454
Eusociality, evolution of sex, genetic conflict, genomic imprinting, haplodiploidy, kin selection, sexual conflict, 631
Female resistance, interlocus contest evolution, male harm, sexual conflict, sexually antagonistic coevolution, 97
Gryllidae, indirect benefits, postcopulatory choice, sexual selection, sperm choice, sperm competition, 792

SIGNALING/COURTSHIP
Escape neurons, foraging, local adaptation, *Myioborus*, predator-prey, visual signaling, 2633

SOCIALITY
Altruism, eusociality, group productivity, group selection, Hamilton's rule, kin selection, social evolution, 2023

SPECIATION
Adaptation, behavioral isolation, incipient species, reproductive isolation, speciation, 279
Adaptation, conchology, Gastropoda, Malaysia, Mollusca, *Opisthostoma*, 1851
Adaptation, *desaturase*-2, gene replacement, genetic background, speciation, 623, 626
Age-range correlation, allopatric speciation, parapatric speciation, phylogenies, speciation theories, sympatric speciation, 601
Allozymes, chromosomes, field for recombination, Highton's genetic distance method, population aggregation analysis, species delimitation, 1050
Amphibia, Appalachians, biodiversity informatics, climate, diversification, montane endemism, niche modeling, Plethodontidae, speciation, 2604
Assortative mating, frequency-dependent selection, genetic variation, intraspecific competition, linkage disequilibrium, multilocus genetics, sympatric speciation, 2185
By-product, Cape flora, distribution ranges, plants, pollination, reinforcement, speciation, 1596
Chromosomal rearrangements, genetic structure, hybrid zones, reproductive isolation, *Sorex araneus*, speciation, 1718
Coalescence, demographic history, phylogeography, speciation, 573
Comparative analysis, Lepidoptera, mimicry, Pleistocene refugia, speciation, 1454
Copepod, electron transport system, hybrid breakdown, intergenomic coadaptation, intrinsic post-zygotic isolation, mitochondrial function, mitochondrial RNA polymerase, 1382
Drosophila yakuba, hybrid zone, speciation, species divergence times, 292
Drosophila, sexual isolation, speciation, *Wolbachia*, 87
Female mate preference, mate choice evolution, mate tolerance, premating isolating barrier, reinforcement selection, reproductive character displacement, sexual selection, species recognition system, 1967

TRADE-OFFS
Allometry, canalization, common principal component, development, genetic variance, outbreeding, selfing, 77
Amphibians, body elongation, comparative methods, evolutionary trade-off, locomotor performance, semi-aquatic lifestyle, 2110
Diversification rate, late Pleistocene, null models, sister species, speciation, 411, 413

VARIATION
Common principal components analysis, matrix constancy, multivariate selection, phenotypic covariance matrices, phenotypic variation, 814
Geographic vocal variation, habitat-dependent selection, population genetic structure, *Ptilonorhynchus violaceus*, vicariance, 1279
Horns, polymorphism, sexual antagonism, sexual selection, trade-off, weapons, 2168
